

Figure S1

Figure S1; Bowel function for salvage radiotherapy group and control group as reported by patients at 12 months after surgery (%)

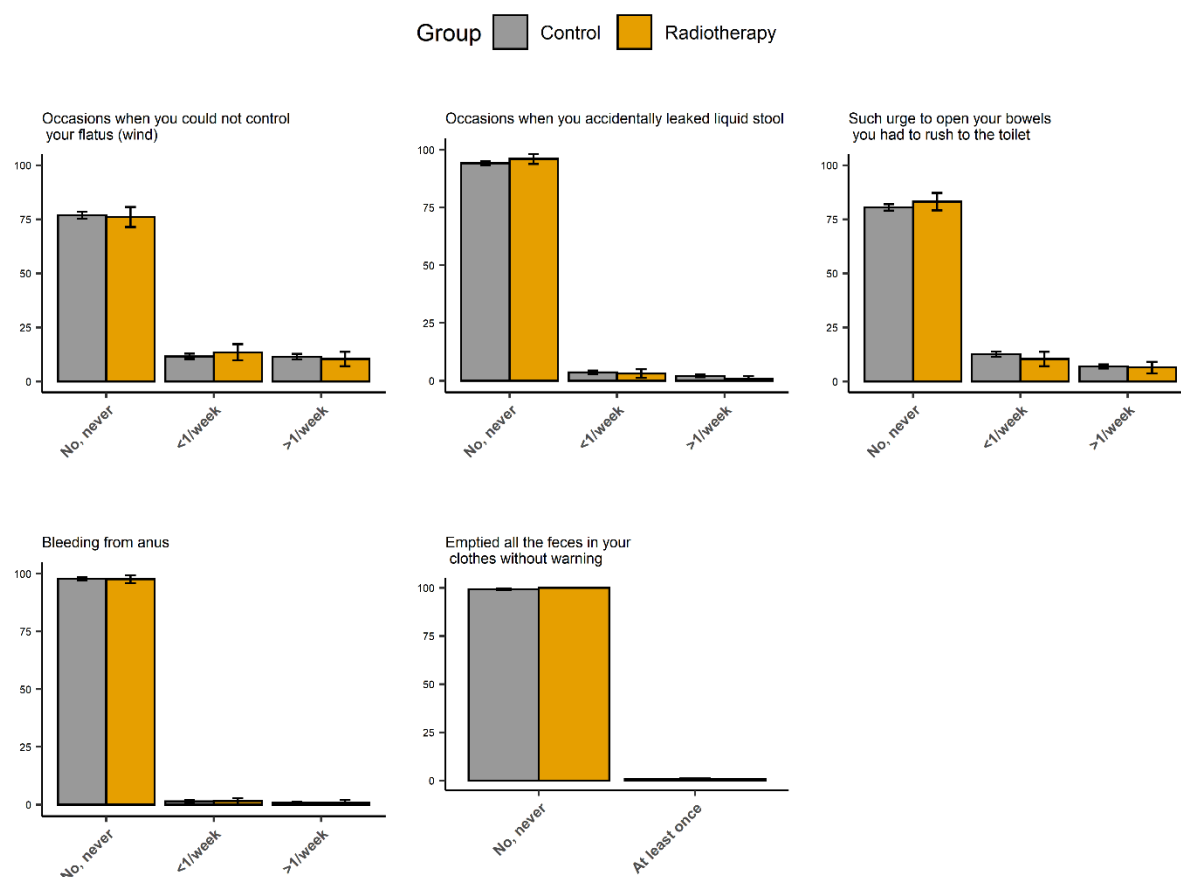

Figure S2

Figure S2; Urinary function for salvage radiotherapy group and control group as reported by patients at 12 months after surgery (%)

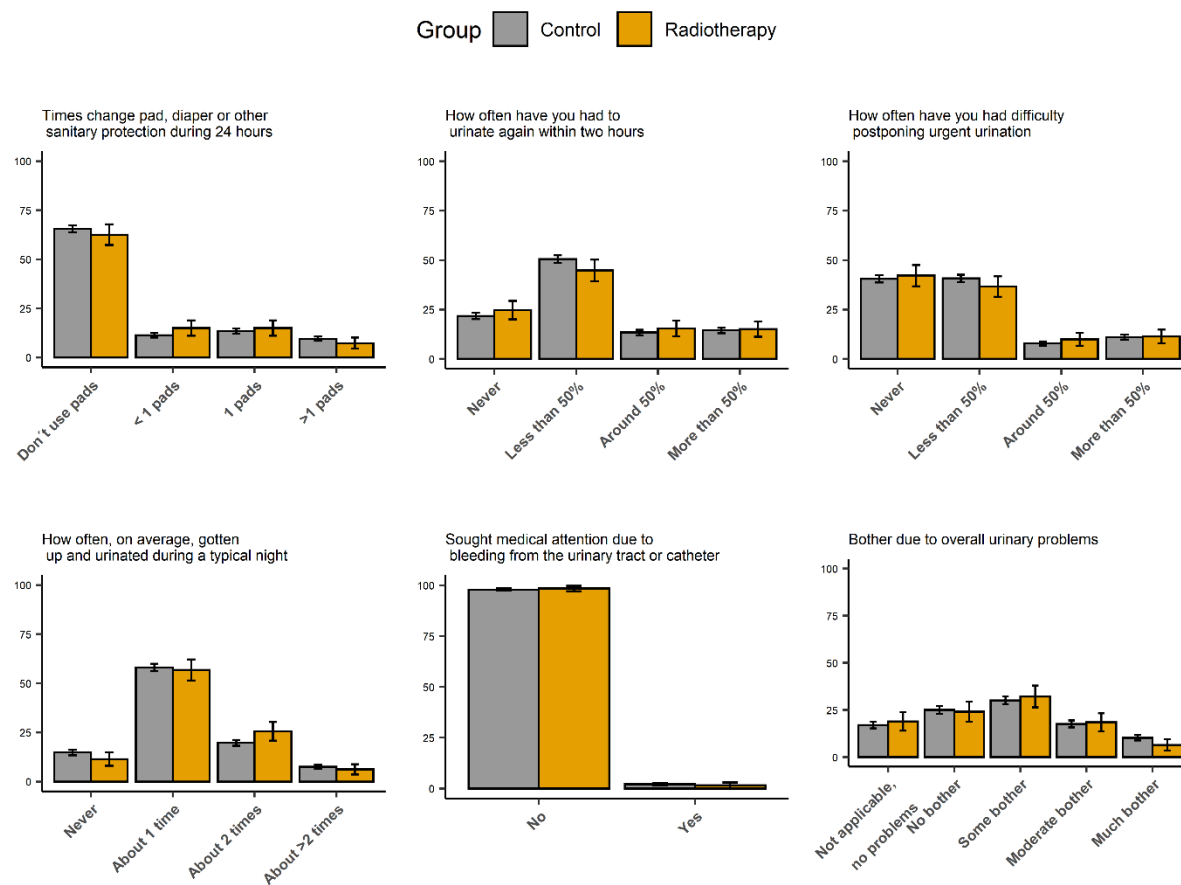

Figure S3

Figure S3; Erectile function and physical health for salvage radiotherapy group and control group as reported by patients at 12 months after surgery (%)

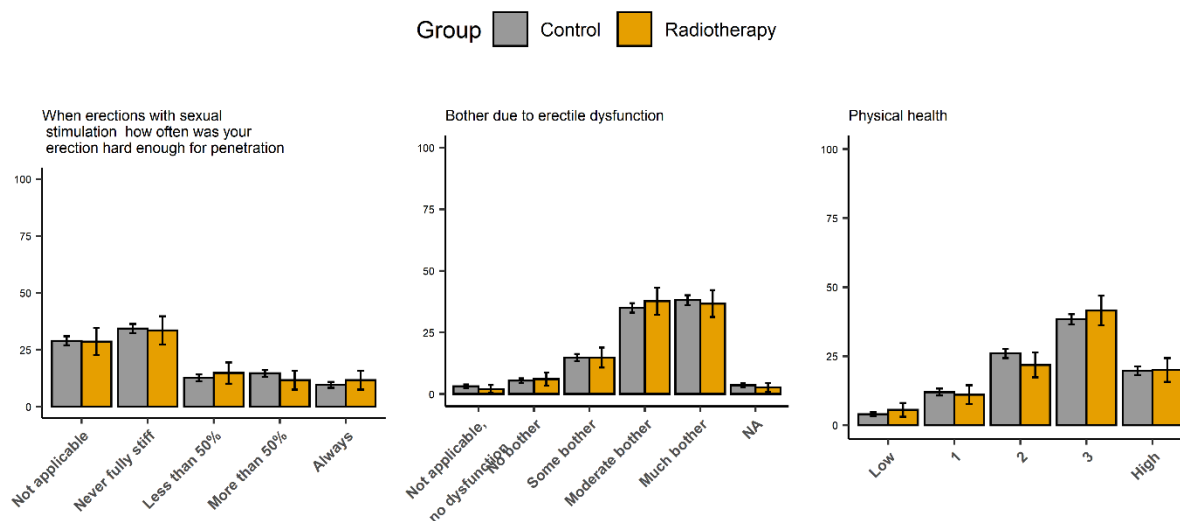

Figure S4

Figure S4; Urinary function for salvage radiotherapy group and control group as reported by patients at 8 years after surgery (%)

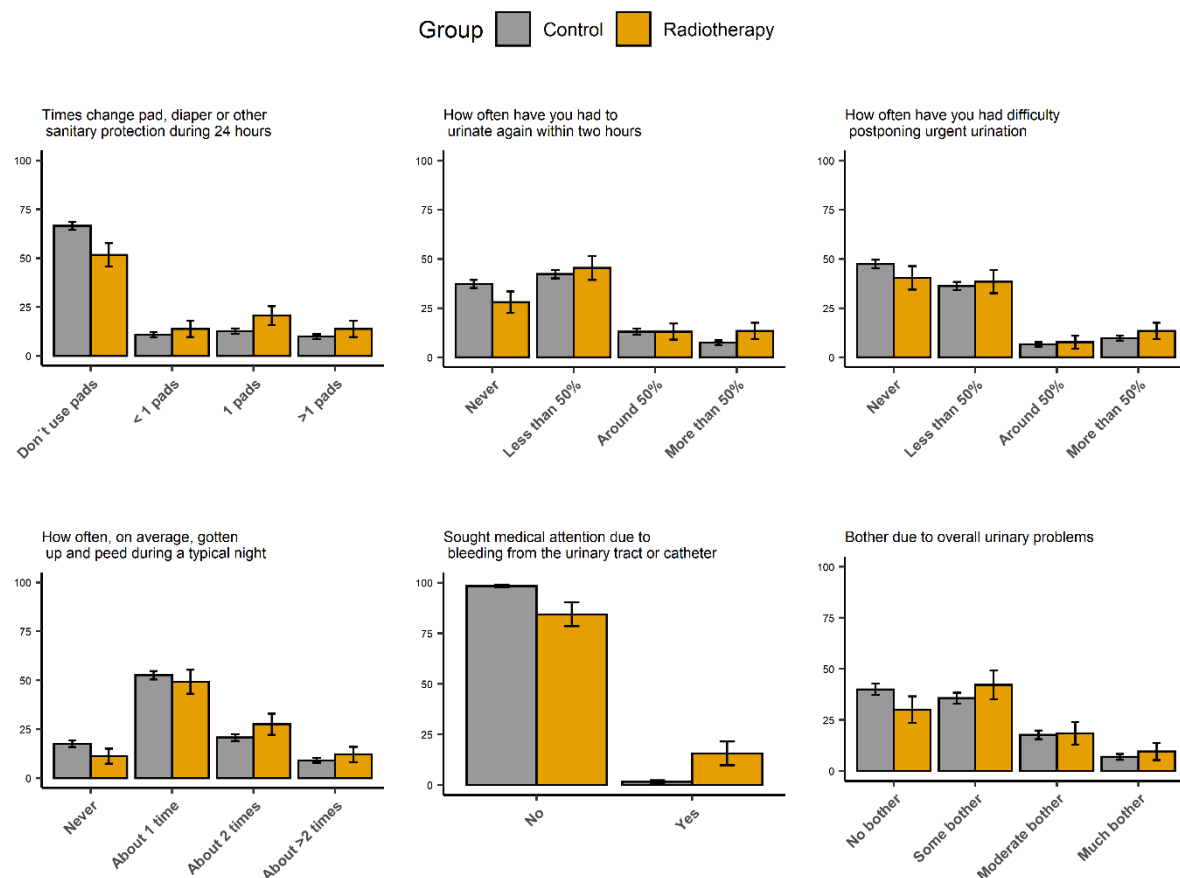

Figure S5

Figure S5; Erectile function and physical health for salvage radiotherapy group and control group as reported by patients at 8 years after surgery (%)

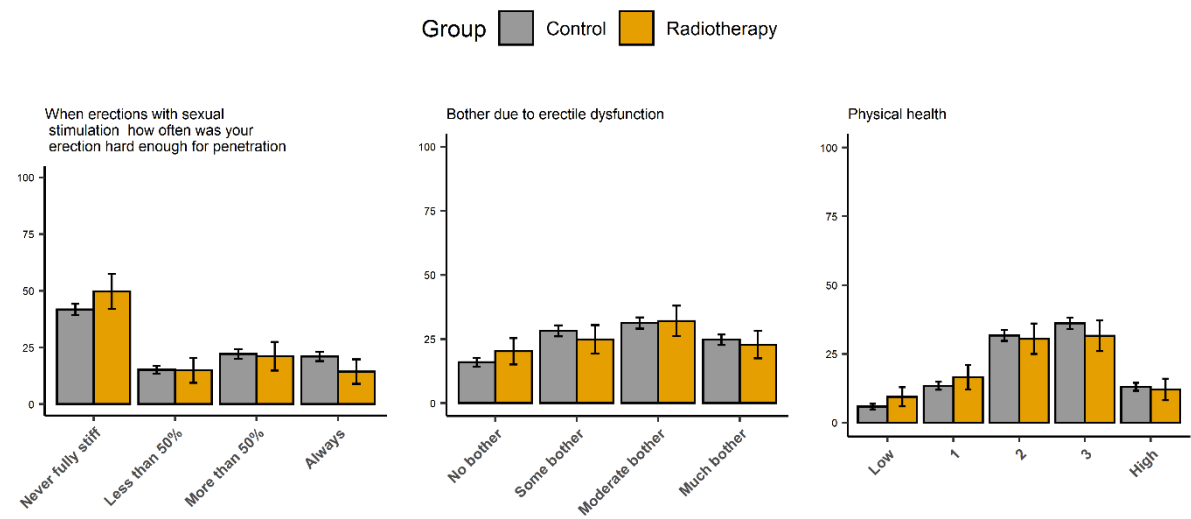

Figure S6

Figure S6; Patient-reported outcomes for the group who received salvage radiotherapy and the control group (without salvage radiotherapy) 8 years postoperatively and odds ratio. Patients receiving hormone therapy before or during follow-up excluded
