Table I. mNGS report of the top ten bacteria identified in lesions

Name	Sequence number ^a
<i>Sphingomonas echinoides</i>	12
<i>Microbacterium ginsengisoli</i>	7
<i>Sphingobium barthaii</i>	6
<i>Dietzia maris</i>	6
<i>Gemmobacter aquaticus</i>	5
<i>Moraxella osloensis</i>	5
<i>Acinetobacter soli</i>	4
<i>Mycobacterium marinum</i>	3
<i>Sphingomonas adhaesiva</i>	3
<i>Chryseobacterium hominis</i>	3

a: The sequence number of the strict comparison of the microorganism detected at the level of species.

Table II. mNGS report of the fungi and parasites identified in lesions

fungi		parasites	
Name	Sequence number ^a	Name	Sequence number ^a
<i>Malassezia japonica</i>	4	<i>Diploscapter pachys</i>	2
<i>Melampsora pinitorqua</i>	3	<i>Entamoeba dispar</i>	1
<i>Malassezia furfur</i>	2	<i>Setaria equina</i>	1
<i>Malassezia globosa</i>	2		
<i>Candida parapsilosis</i>	2		
<i>Cladosporium sphaerospermum</i>	2		
<i>Penicillium citrinum</i>	1		
<i>Penicillium oxalicum</i>	1		
<i>Wallemia mellicola</i>	1		

a: The sequence number of the strict comparison of the microorganism detected at the level of species.
