

Table SII. Description of selected studies

Study	Psychiatric assessment	Continent	Design	Number of patients	Age category	Age	Female	PASI	Duration	Age onset	Psoriatic Arthritis	Risk of bias	Prevalence [CI95%]	OR [CI95%]
Separation Anxiety Disorder														
2019 Kara ²⁶	Interview	Middle East	Prospective	54	Children	10.7	48		3.0	7.6		Moderate	11 [5-22]	6.6 [0.8-57]
Specific Phobia														
1987 Lyketsos ²⁷	Interview	Europe	Prospective	26	Adults							High	12 [4-29]	
1994 Mazzetti ²⁸	Interview	Europe	Prospective	80	Adults	34.7	48					Moderate	4 [1-10]	
2019 Kara ²⁶	Interview	Middle East	Prospective	54	Children	10.7	48		3.0	7.6		Moderate	7 [3-18]	1.4 [0.3-6.4]
Social Anxiety Disorder														
2006 Consoli ²⁹	Interview	Europe	Prospective	93	Adults	47.9	48	7.1	18.5			Moderate	1 [0-6]	
2007 Mehta ³⁰	Interview	Asia	Prospective	50	Children and adults	38.0		9.9	6.7	31.1		Moderate	2 [0-10]	
2009 Biljan ³¹	Interview	Europe	Prospective	70	Adults	51	49					Moderate	3 [1-10]	
2012 Golpour ³²	Interview	Middle East	Prospective	100	Adults	34.3	56					Moderate	4 [2-10]	4.1 [0.5-37.6]
2016 Luca ³³	Self-administered questionnaires	Europe	Prospective	102	Adults	48.7	50	6.0				High	46 [37-56]	
2017 Lakuta ³⁴	Self-administered questionnaire	Europe	Prospective	193	Adults	36.4	68		16.8	19.6	19	High	33 [27-40]	
2019 Belvisi ³⁵	Interview	Europe	Prospective	76	Adults	62.2	48			56.7		High		0.4 [0.0-8.6]
2019 Kara ²⁶	Interview	Middle East	Prospective	54	Children	10.7	48		3.0	7.6		Moderate	13 [6-24]	1.9 [0.5-6.8]
2019 Leisner ³⁶	Medical records	Europe	Retrospective	13 675	Children and adults		50					Low	0 [0-0]	1.6 [0.9-2.8]
Panic Disorder														
2006 Consoli ²⁹	Interview	Europe	Prospective	93	Adults	47.9	48	7.1	18.5			Moderate	6 [3-13]	
2009 Biljan ³¹	Interview	Europe	Prospective	70	Adults	51	49					Moderate	1 [0-8]	

2019 Belvisi ³⁵	Interview	Europe	Prospective	76	Adults	62.2	48	56.7	High	1 [0-7]	1.1 [0.1-17.2]
2019 Leisner ³⁶	Medical records	Europe	Retrospective	13 675	Children and adults		50		Low	0 [0-0]	1.3 [0.6-2.8]
Agoraphobia											
2006 Consoli ²⁹	Interview	Europe	Prospective	93	Adults	47.9	48	7.1	18.5	Moderate	5 [2-12]
2019 Belvisi ³⁵	Interview	Europe	Prospective	76	Adults	62.2	48	56.7	High		0.4 [0-8.6]
Generalized Anxiety Disorder											
1987 Lyketsos ²⁷	Interview	Europe	Prospective	26	Adults					High	31 [17-50]
1994 Mazzetti ²⁸	Interview	Europe	Prospective	80	Adults	34.7	48			Moderate	8 [3-15]
2006 Consoli ²⁹	Interview	Europe	Prospective	93	Adults	47.9	48	7.1	18.5	Moderate	18 [12-27]
2007 Mehta ³⁰	Interview	Asia	Prospective	50	Children and adults	38.0		9.9	6.7	31.1	Moderate 4 [1-13]
2009 Biljan ³¹	Interview	Europe	Prospective	70	Adults	51.0	49			Moderate	10 [5-19]
2014 Rayner ³⁷	Self-administered questionnaire	Europe	Prospective	330	Adults					Low	15 [11-19]
2015 Lakshmy ³⁸	Self-administered questionnaire	Asia	Prospective	90	Adults	41.9	43			Moderate	77 [67-84]
2016 Li ³⁹	Self-administered questionnaire	Asia	Prospective	200	Adults	40.6	47	8.0		Low	9 [6-14]
2017 Jain ⁴⁰	Interview	Asia	Prospective	50	Adults	28.2	44	4.2		High	12 [6-24]
2017 Lamb ⁴¹	Self-administered questionnaire	Europe	Prospective	607	Unknown	47.0	35	5.5	18	Low	13 [11-16]
2019 Belvisi ³⁵	Interview	Europe	Prospective	76	Adults	62.2	48		56.7	High	8 [4-16] 0.4 [0.0-8.6]
2019 Kara ²⁶	Interview	Middle East	Prospective	54	Children	10.7	48	3.0	7.6	Moderate	22 [13-35] 15.1 [1.9-121.2]

2019 Leisner ³⁶	Medical records	Europe	Retrospective	13 675	Children and adults	50			Low	0 [0-0]	1.7 [1.0-2.9]
2019 Tian ⁴²	Self-administered questionnaire	Asia	Prospective	208	Adults	40.8	36	14.4	Moderate	11 [7-15]	
Unspecified Anxiety Disorder											
1994 Mazzetti ²⁸	Interview	Europe	Prospective	80	Adults	34.7	48		Moderate	13 [7-22]	
2009 Biljan ³¹	Interview	Europe	Prospective	70	Adults	51.0	49		Moderate	64 [53-74]	
2011 Han ⁴³	Medical records	Europe	Retrospective	7971	Adults	47.2	50		Low	7 [6-8]	1.6 [1.5-1.8]
2013 Lan ⁴⁴	Medical records	Asia	Retrospective	7921	Adults				High	23 [22-24]	1.3 [1.2-1.4]
2014 Kimball ⁴⁵	Medical records	International	Prospective	11900	Adults	48.6	45	17.5	36	Moderate	11 [11-12]
2014 Sahiner ⁴⁶	Interview	Middle East	Prospective	31	Adults	42.1	55		High	16 [7-33]	
2014 Sanchez-Carazo ⁴⁷	Report by the investigator	Europe	Prospective	1022	Adults	46.3	40	20.0	21.0	16	Moderate 16 [14-18]
2015 Feldman ⁴⁸	Medical records	North America	Retrospective	5492	Adults	47.6	45		Low	6 [6-7]	1.5 [1.3-1.8]
2015 Karia ⁴⁹	Interview	Asia	Prospective	50	Adults	39.8	30	4.4	8.6	Moderate	12 [6-24] 3.3 [0.6-17.0]
2016 Offidani ⁵⁰	Interview	Europe	Prospective	70	Adults	47.9	33		Moderate	9 [4-17]	
2017 Armstrong ⁵¹	Medical records	North America	Retrospective	18653	Unknown	48.1	49		12	Low	9 [9-10]
2017 Sorour ⁵²	Interview	Africa	Prospective	300	Adults		44		Moderate	24 [20-29]	
2018 Feldman ⁵³	Medical records	North America	Retrospective	114824	Adults	53.0	54		Low	7 [7-8]	1.3 [1.3-1.4]
2018 Galili ⁵⁴	Interview	Europe	Prospective	1135	Adults				Moderate	1 [1-2]	2.0 [1.3-3.3]
2018 Huilaja ⁵⁵	Medical records	Europe	Retrospective	17318	Adults	41.6	58		Low	5 [5-5]	1.3 [1.2-1.5]s

2018 Strober ⁵⁶	Medical records	International	Retrospective	7490	Adults	48.0	40	17.8	13	Moderate	6 [5-6]
2019 Bang ⁵⁷	Medical records	Asia	Retrospective	12 762	Adults					Low	2.9 [2.7-3.2]
2019 Kara ²⁶	Interview	Middle East	Prospective	54	Children	10.7	48	3.0	7.6	Moderate	65 [51-76] 9.2 [3.7-22.8]
2019 Paller ⁵⁸	Medical records	North America	Retrospective	7 686	Children	12.9	56			Moderate	0 [0-0] 2.6 [1.7-4.0]
2019 Parisi ⁵⁹	Medical records	Europe	Retrospective	56961	Adults		52			Low	18 [18-18] 1.2 [1.1-1.2]
2019 Patel ⁶⁰	Medical records	North America	Retrospective	188 089	Children and adults					Low	6 [6-6] 2.1 [2.1-2.2]
2019 Tzur Bitan ⁶¹	Medical records	Middle East	Retrospective	127 931	Adults					Low	3 [3-3] 1.2 [1.1-1.2]

Anxiety symptoms

1985 Jowett ⁶²	Self-report	Europe	Prospective	38	Adults	50.0		13		High	58 [42-72]
1991 Price ⁶³	Self-administered questionnaire	Europe	Prospective	23	Adults	44.5	48	21.17		High	26 [13-46]
1993 Finzi ⁶⁴	Self-administered questionnaire	Europe	Prospective	179	Adults					High	58 [51-65]
2000 Scharloo ⁶⁵	Self-administered questionnaire	Europe	Prospective	69	Adults	48.3	45	26.6		Moderate	16 [9-25]

Age (Age), PASI score (PASI), psoriasis duration (Duration) and age at psoriasis onset (Age onset) of patients included in each studies are presented as mean when available.

Female and Psoriatic Arthritis are proportion (in percentage) of included patients.

Obsessive Compulsive Disorder was no longer classified among anxiety disorders in the DSM5 but we nevertheless elected to include in our analysis studies as it was used in previous versions of the DSM (Diagnostic and Statistical Manual of Mental Disorders).

OR: Odds ratio was determined for study with healthy participant comparison.

Prevalence and OR in italic are studies excluded from the corresponding meta-analyses because of heterogeneity or risk of publication bias.
