

**Table SIV. Pearson's correlations between psychological factors and observationally learned nocebo effects (n = 21)**

Measure	Mean	SD	Range	Correlation with nocebo effect on itch*
STAI state	39.6	8.3	23-50	-0.12
PSS	16.9	5.4	5-26	0.19
PANAS (positive)	30.0	6.5	18-44	0.03
PANAS (negative)	13.8	3.4	10-22	-0.27
B-IRI (fantasy)	18.4	1.8	14-20	-0.16
B-IRI (perspective taking)	18.9	1.6	14-20	0.12
B-IRI (personal distress)	14.9	2.5	9-20	0.39
B-IRI (empathic concern)	18.8	1.5	14-20	-0.01

STAI: State-Trait Anxiety Inventory; PSS: Perceived Stress Scale; PANAS: Positive and Negative Affect Schedule; B-IRI: Brief Interpersonal Reactivity Index; SD: standard deviation.

\*No significant correlations (all  $p > 0.05$ ).
