

Supplementary material has been published as submitted. It has not been copyedited, typeset or checked for scientific content by Acta Dermato-Venereologica

Fig. S1. Funnel plot of Breslow thickness comparison of pre-COVID vs post-COVID period in papers studying long-term changes in melanoma. It shows an asymmetric distribution of the studied effects, so publication bias is possible. MD: mean difference.

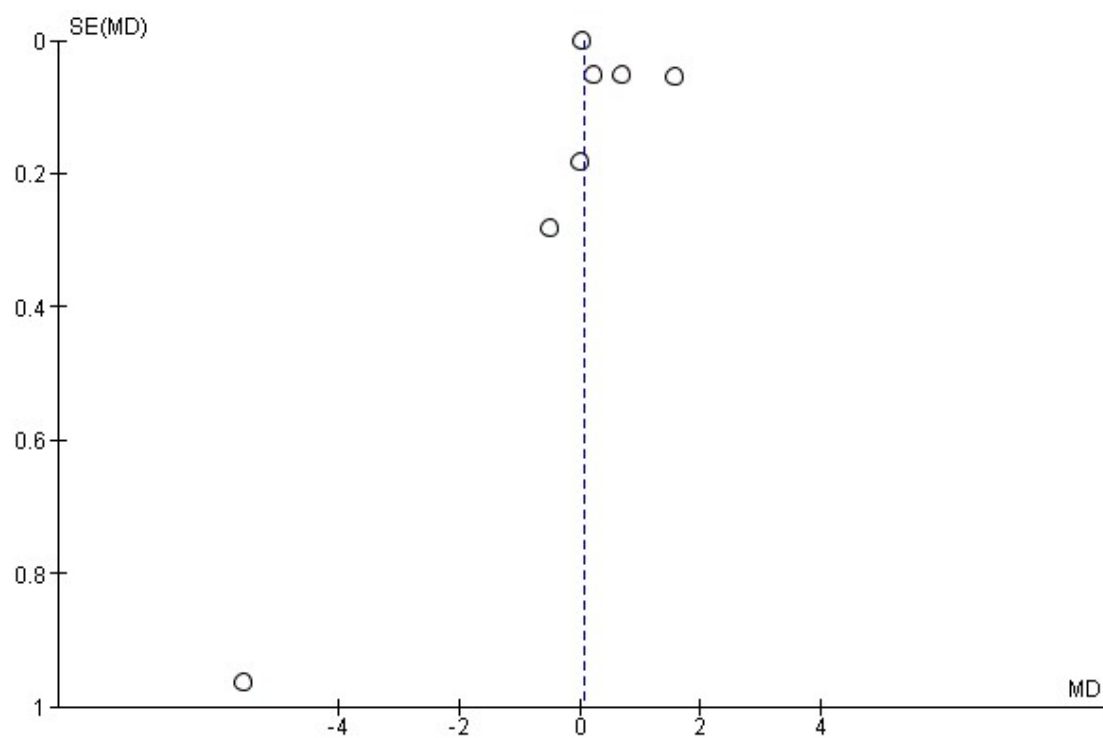

Fig. S2. Funnel plot of ulceration comparison of pre-COVID vs post-COVID period in papers studying long-term changes in melanoma. It shows an asymmetric distribution of the studied effects, so publication bias is possible. OR: odds ratio
