

Table SII. Severity assessment of psoriatic arthritis including the modified Composite Psoriatic Disease Activity Index (5)

	Definition
Severe disease in ≥ 3 of the 4 domains on the CPDAI, <i>n</i> (%)	The presence of severe disease in ≥ 3 of the 4 domains listed below
Spinal disease	The findings of spinal involvement by magnetic resonance imaging
Dactylitis ≥ 3 digits	The presence of over 3 involved digits based on the digit score
Peripheral arthritis ≥ 4 joints	The presence of over 4 swollen or tender joints
Enthesitis ≥ 3 sites	The presence of over 3 involved sites based on the Leeds Enthesitis Index
Bone erosion and deformation	The presence of bone erosion and deformation on X-ray or magnetic resonance imaging

CPDAI: Composite Psoriatic Disease Activity Index.
