

Fig. SI. Pathological presentation of patient 1. Dense dermal infiltrate of small- and medium-size atypical T cells with CD3⁺ CD4⁺ CD5⁺ CD7⁻ CD8⁻ phenotype admixed with large CD20⁺ Pax5⁺ EBER⁺ atypical B cells. (a) Haematoxylin/eosin staining; (b) immunostaining with CD3; (c) immunostaining with CD20; (d) EBER expression in *in situ* hybridization.
