Table SII. Univariate and multivariate logistic regression model associated with positive BP180 enzyme-linked immunoassay (ELISA) results in HIV⁻ control patients

	Univariate models			Final multivariate model		
	OR	95% CI	*p*-value	OR	95% CI	*p*-value
Age, years	1.03	0.99–1.08	0.11	1.03	0.98–1.09	0.20
Male sex	0.46	0.10–2.11	0.31			
Positive TPPA	**5.40**	**1.54–18.93**	**0.008**	**4.70**	**1.30–16.86**	**0.018**
Nuclear staining	1.11	0.24–5.25	0.14	0.69	0.08–5.80	0.729

Values showing significance are written in bold.
OR: odds ratio; CI: confidence interval; TPPA: treponema pallidum particle agglutination test.
