We conducted a search in the database Pubmed to compare the total amount of studies on SDoH within each medical specialty.

The table shows the total results/hits for each search.

[*1 Specialties listed at the Department of Clinical Medicine – University of Copenhagen \(ku.dk\)](#)

[*2](#). The search terms followed the template "SDoH AND [specialty]", such as "SDoH AND Dermatology". Table 1 presents the results in order from highest to lowest amount of studies ranking dermatology as the fifth last of all 35 specialties.

[*3](#) To calculate the proportion of research in SDoH compared to the magnitude of total studies in each specialty another search was done using only the name of the specialty as a search term, such as "Dermatology".
