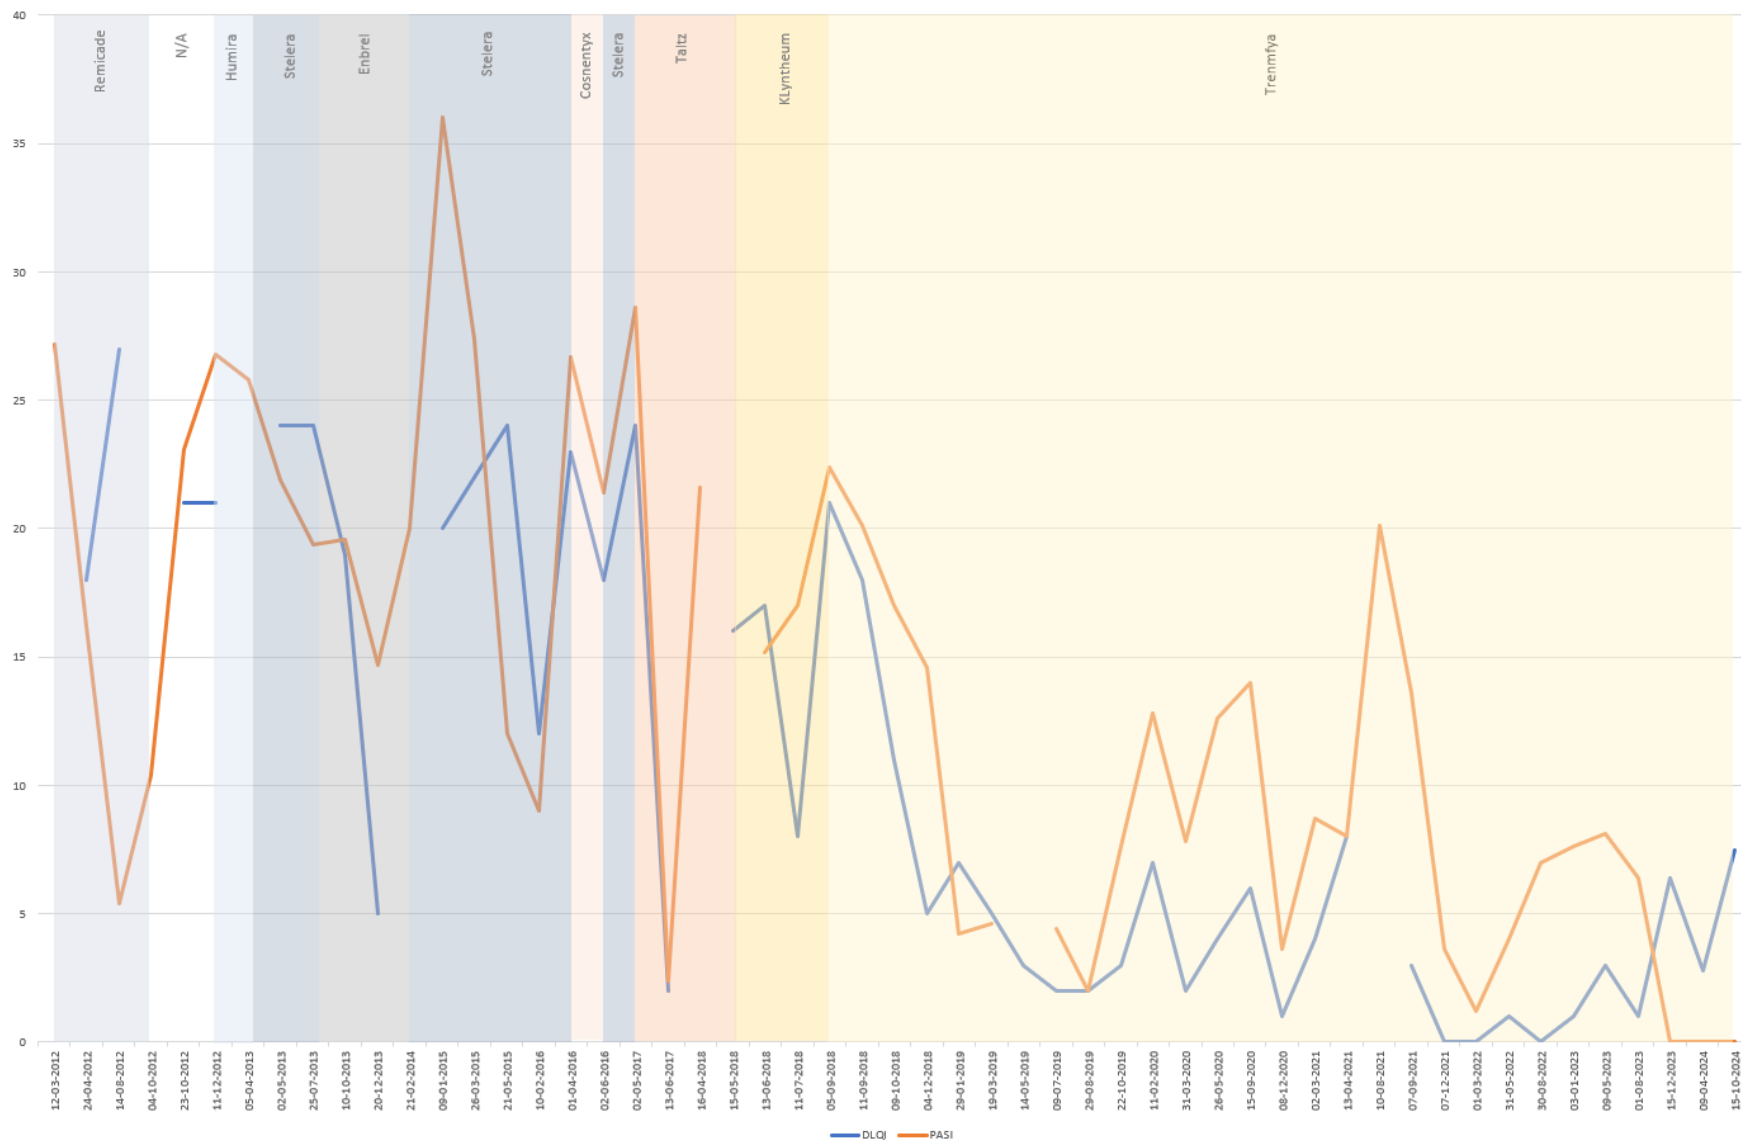

Figure S1. PASI and DLQI trends with biologic treatment for case 1-4

Figures 1a-d show PASI and DLQI trends with biologic treatment. The selection of treatment and the subsequent switch in drug class were determined by the presence of psoriasis lesions and concurrent psoriatic arthritis. Abbreviation: DLQI, Dermatology Life Quality Index; PASI, Psoriasis Area Severity Index (PASI).

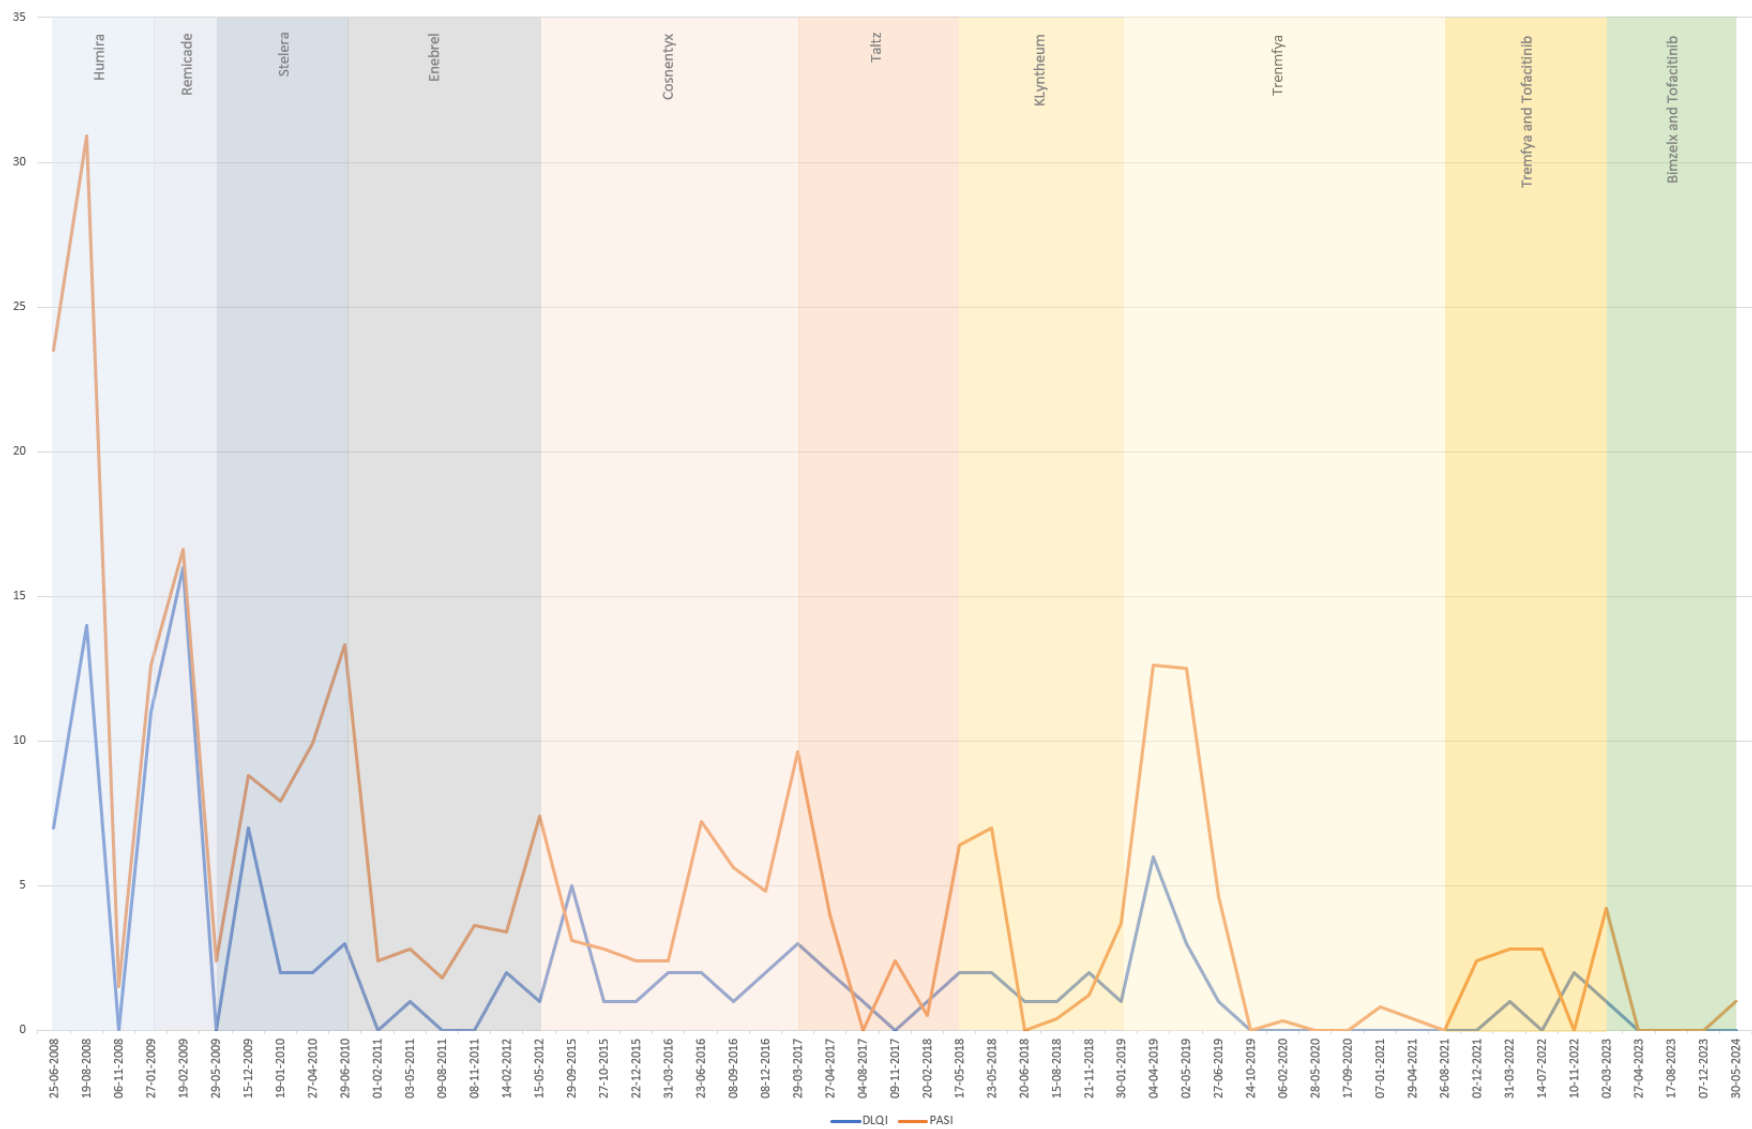

Supplementary 1a. PASI and DLQI trends with biologic treatment for case 1.

Supplementary 1b. PASI and DLQI trends with biologic treatment for case 2.

Supplementary 1c. PASI and DLQI trends with biologic treatment for case 3.

Supplementary 1d. PASI and DLQI trends with biologic treatment for case 4.
