

Appendix S1

Questionnaire (to be answered by the elderly care physician; English translation)

Sex:

Age:

Patient legally competent to make medical decisions? (yes/no)

Reason for consultation:

Did you already use diagnostic procedures? If yes, what kind of procedure did you use and what was the result?

Did you perform/start treatment? If yes, what kind of treatment and what was the result?

Did you already consult a dermatologist regarding the reason for consultation? (yes/no – live/telephone/e-mail)

Was the patient already seen in clinic by a dermatologist regarding the reason for consultation? (yes/no)

Did the dermatologist already visit the patient in the nursing home regarding the reason for consultation? (yes/no)

Medical history:

Current medication:

Questionnaire (to be answered by a dermatologist; English translation)

Date:

Name:

What diagnoses did you make as a result of the reason for consultation?

Are there any other additional diagnoses apart from the reason for consultation (secondary diagnosis)?

Did you use diagnostic procedures? If yes, what kind of procedure did you use (e.g. dermoscopy)?

Did you perform/start treatment? If yes, what kind of treatment?

Could you estimate whether or not you would have advised the same policy when you would have only been consulted by teledermatology?

Answer: Yes – No – Don't know

How much added value do you estimate for this live consultation in comparison with contact by teledermatology only? (please choose one number below)

Answer: 1 – 2 – 3 – 4 – 5 (1=no added value, 5=a lot of added value)

If you think live consultation has added value in this case in comparison with contact by teledermatology only, could you explain why?
