

## SUPPLEMENTAL FIGURE LEGENDS

**Fig. S1. Scatter plot showing the relationship between TARC/CCL17 and DLQI.** TARC/CCL17 at baseline was a moderate predictor of DLQI. *DLQI*, dermatology life quality index; *TARC/CCL17*, thymus and activation regulated chemokine/ CC chemokine-ligand-17.

**Fig. S2. Scatter plot showing the relationship between DLQI question 1 and pruritus according to NRS.** The pruritus NRS at baseline was a strong predictor of the DLQI domain of symptoms (question 1). *DLQI*, dermatology life quality index; *NRS*, numeric rating scale.
