

Supplementary Figures have been published as submitted, and have not been copyedited, typeset or checked for scientific content by Acta Dermato-Venereologica

Fig. S1. ¹H-NMR spectrum of purified 2-SQOOH in CDCl₃

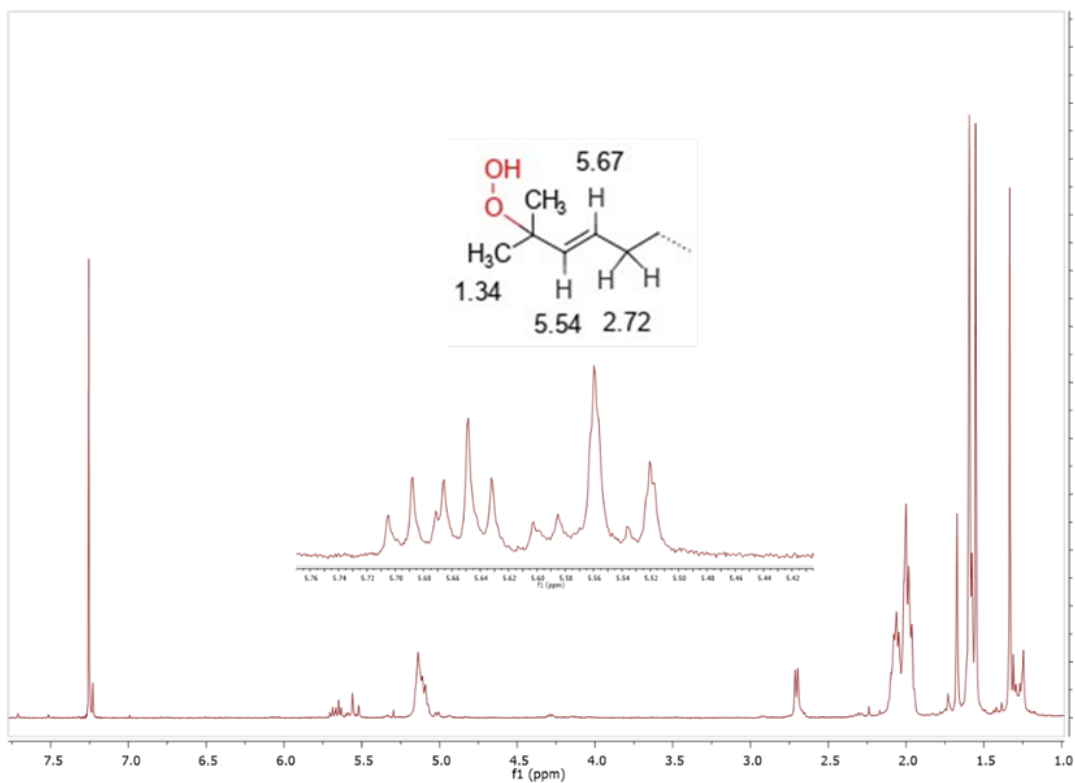

Fig. S2. COSY spectrum of SQ and 2-SQOOH in CDCl₃

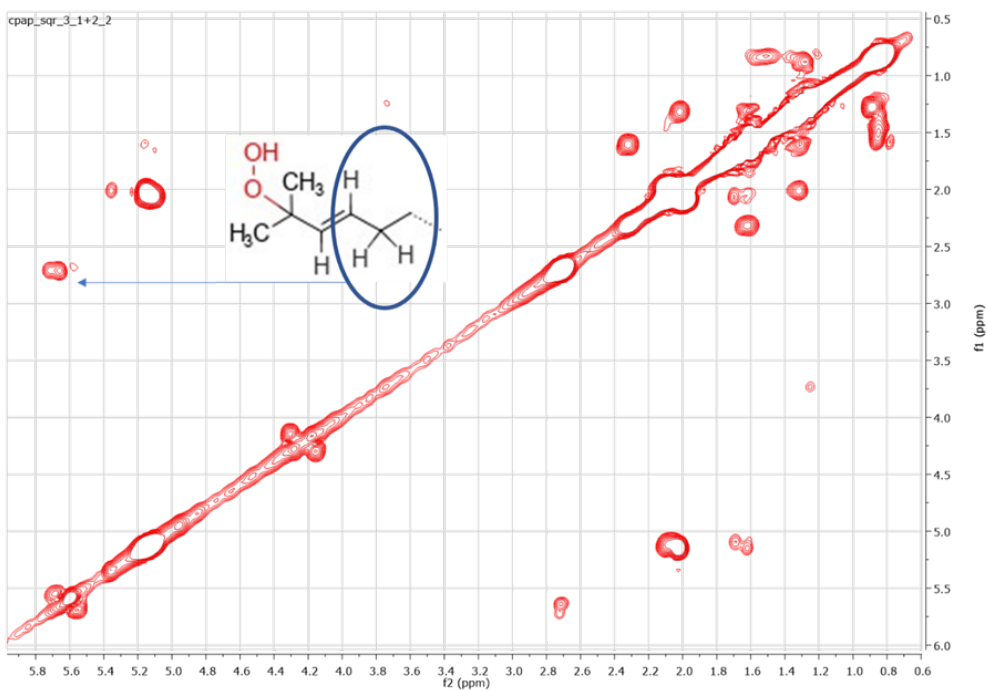

Fig. S3. COSY spectrum (CDCl_3) of the control culture with linoleic acid and SQ but without *M. restricta*. A negligible amount of 2-SQOOH was observed by the presence of minor cross-peaks at 5.67/2.72.
