CORRIGENDUM

In: Schaarschmidt ML, Kromer C, Herr R, Schmieder A, Goerdt S, Peitsch WK. Treatment Satisfaction of Patients with Psoriasis. Acta Derm Venereol 2015; 95: 572–578, the authors would like to add a precision:

In our study Treatment Satisfaction Questionnaire for Medication (TSQM) scores were calculated separately for each domain and added to a total score. However, the TSQM has not been validated as a total score and IQVIA does not support a total score for the TSQM. The authors ask to take this into account when interpreting the results.
