**Table S1:** Case definition of incident Psoriasis/Psoriatic arthritis with associated ICD-10 diagnosis codes.

|   | <b>ICD-10 code</b>               |
|---|----------------------------------|
| <b>Inclusion</b>  |                                  |
| Psoriasis   | L40.X except L405xx              |
| Psoriatic arthritis   | L405, M07.0-M07.3                |
| <b>Exclusion</b>  |                                  |
| Rheumatoid arthritis, GOUT arthropathy                                    | M05, M06, M10, M140, M315, M353, |
| Arthritis mutilans  | M071                             |
| Juvenile arthritis  | M082                             |
| Systemic sclerosis  | M34                              |
| Subacute cutaneous lupus erythematosus                                    | L93, M32                         |
| Crohn's disease, ulcerative colitis including joint manifestation of IBD. | M074, M075, M076, K50, K51       |
| Ankylosing spondylitis  | M072, M45                        |

**Table S2:** Pharmacological treatment of PsO/PsA.

| Class                            | International non-proprietary name                     | ATC code or treatment code      | Categorization                 |
|----------------------------------|--|---------------------------------|--------------------------------|
| <b>Phototherapy</b>              |  |                                 |                                |
|                                  | psoralen (P) and long-wave ultraviolet radiation (UVA) | code:DQ014, DQ011, DQ010, DQ009 |                                |
| <b>Pharmacological treatment</b> |  |                                 |                                |
| Systemic                         | Methotrexate   | L04AX03                         | Methotrexate                   |
|                                  | Etanercept   | L04AB01                         | Biologics                      |
|                                  | Adalimumab   | L04AB04                         |                                |
|                                  | Infliximab   | L04AB02                         |                                |
|                                  | Certolizumab pegol                                     | L04AB05                         |                                |
|                                  | Ixekizumab   | L04AC13                         |                                |
|                                  | Sekukinumab  | L04AC10                         |                                |
|                                  | Brodalumab   | L04AC12                         |                                |
|                                  | Ustekinumab  | L04AC05                         |                                |
|                                  | Guselkumab   | L04AC16                         |                                |
|                                  | Risankizumab   | L04AC18                         |                                |
|                                  | Abatacept  | L04AA24                         |                                |

|                                  | Pimekrolimus   | D11AH02                         |                                |

**Table S3.** Definitions and categorizations of covariates.

| <b>Variable</b>   | <b>Categorization</b>  | <b>ICD 10 codes</b>  |
|---|--|--|
| <b>Demographic</b>  |  |  |
| Sex   | Man; woman   |  |
| Age category, years   | <18; 18-44; 45-64; 65+   |  |
| <b>Laboratory variables (closest to the index date in the past 12 months)</b> |  |  |
| eGFR (mL/min/1.73 m <sup>2</sup> )  | Continuous   |  |
| eGFR category (mL/min/1.73 m <sup>2</sup> )                                   | <60 / >60 / <30  |  |
| C-reactive protein (mg/dL)  | <1; 1-3; 3-<10; >=10   |  |
| Haemoglobin level g/dL  | <10; >= 10   |  |
| Aspartate aminotransferase (AST) (IU/L)                                       | Normal (<100); mild elevation (100-249); Moderate elevation (250-2000); severe (>2000) |  |
| Alanine aminotransferase (AST) (IU/L)   | Normal (<100); mild elevation (100-249); Moderate elevation (250-2000); severe (>2000) |  |
| <b>Psoriasis type</b>   |  |  |
|   | PsO; PsA   | PsO : L40.X except L405xx;<br>PsA : L405, M07.0-M07.3  |
| <b>Care settings</b>  | Dermatology or Rheumatology/<br>Others   | As per Swedish National Board of Health and Welfare classification codes for hospitals and clinics |
| <b>Comorbidities</b>  |  |  |
| Diabetes Mellitus   | Yes/No   | E10 – E14  |
| Hypertension  | Yes/No   | I10 – I15  |
| Myocardial Infarction   | Yes/No   | I21, I22, I252   |
| Heart failure   | Yes/No   | I50, I110, I113, I971, K761, P290  |

|  |        |  |
|--|--------|--|
| Peripheral vascular disease  | Yes/No | I70-71, I731, I738, I739, I771, I790, I792, K551, K558, K559, Z958, Z959 |
| Cerebrovascular disease  | Yes/No | G45-46, H340, I60-69   |
| Atrial fibrillation  | Yes/No | I48  |
| Chronic obstructive pulmonary disease                                      | Yes/No | J40 – J47  |
| Liver disease  | Yes/No | K76  |
| <b><i>Medications (closest to the index date in the past 180 days)</i></b> |        |  |
| RASi   | Yes/No | C09A, C09B, C09C, C09D   |
| Diuretic   | Yes/No | C03  |
| Beta-blocker   | Yes/No | C07  |
| Lipid-lowering   | Yes/No | C10AA  |
| Anti-diabetics   | Yes/No | A10  |
| Systemic glucocorticoids   | Yes/No | H02  |
| NSAIDs   | Yes/No | M01A   |

**Table S4:** Baseline characteristics of patients included in Persistence, re-initiation, switching, and enrichment of systemic treatments analysis, by class of treatment.

|                               | <b>Biologics,<br/>N = 609</b> | <b>Methotrexate,<br/>N = 4,079</b> | <b>other systemic DMARDs,<br/>N = 1,621</b> | <b>Combination treatment,<br/>N = 36</b> | <b>Overall,<br/>N = 6,345</b> |
|-------------------------------|-------------------------------|------------------------------------|---|--|-------------------------------|
| <b>Age in year; mean [SD]</b> | 45.5 [15.4]                   | 50.8 [16.8]                        | 52.6 [16.2]                                 | 51.2 [16.8]                              | 50.8 [16.6]                   |
