

Fig. S3. *Staphylococcus aureus*, and *S. hominis* abundances on the skin. The relative abundance of *S. epidermidis* (ASV1), *S. aureus* (ASV2), and *S. hominis* (ASV12) on the hands of patients (lesional skin and non-lesional skin) and healthy controls. Statistical significance: * $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$ (Wilcoxon rank sum test).
