

Fig. S2. (a) Total number of infiltrating cells, and percentage of dermal cells immunoreactive for (b) CD45RO and (c) CD68 in different skin diseases characterized by pruritus. Asterisks indicate differences between atopic dermatitis and the other skin diseases, respectively (* $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$). Error bars indicate standard errors of the mean (SEM).
