ICELAND*

By a resolution of the Icelandic Parliament (Altinget), Nr. 44/1941, it was resolved that education in odontology should start in Iceland.
 Subordinated to the Faculty of Me-

dicine of the University of Iceland, the dental school was established in 1945.

On 2nd May 1972 the status of the dental school was changed to an independent odontological faculty (Tannlaeknadeild, Háskóla Íslands).

A qualified dentist is entitled to present and to defend in public a scientific dissertation for the doctor-degree, *Odontologiae doctor*, a title that in 1972 was changed to *Doctor odontologiae*.

The doctor-diploma is issued in two copies, one with the text in Latin, the other with the text in Icelandic.
