

COMMENT

ON "THE TUBULES OF MARSUPIAL ENAMEL INVESTIGATED BY NORMAL LIGHT, BY POLARIZED LIGHT AND BY CONTACT MICRORADIOGRAPHY", BY GISLE FOSSE, ACTA ODONT. SCAND., 27: 237—248, 1969

The author wishes to correct the reference to *A. Boyde* (1964). Boyde has demonstrated the existence of marsupial enamel tubules and described his findings in the following articles:

- Boyde, A.*, 1963: Development, position and function of tubules in marsupial enamel, *J. Dent. Res.* 42: 1115.
- »— 1964: The structure and development of mammalian enamel. Thesis. University of London.
- »— & *K. S. Lester*, 1967: The structure and development of marsupial enamel tubules, *Zeitschr. Zellforsch.* 82: 558—576.
