

## Appendix 1

Project number

Date

|                                            | Number               |
|--------------------------------------------|----------------------|
| Teeth in need of a filling or crown        | <input type="text"/> |
| Teeth in need for periodontal treatment    | <input type="text"/> |
| Teeth in need of endodontic treatment      | <input type="text"/> |
| Teeth that need replacement (1-5)          | <input type="text"/> |
| Number of dentures needed                  | <input type="text"/> |
| Teeth that need extraction                 | <input type="text"/> |
| Total number of teeth in need of treatment | <input type="text"/> |

**Appendix 2**

Project number

Date

|                                            | Number |
|--------------------------------------------|--------|
| Teeth in need of a filling or crown        |        |
| Teeth in need for periodontal treatment    |        |
| Teeth in need of endodontic treatment      |        |
| Teeth that need replacement (1-5)          |        |
| Number of dentures needed                  |        |
| Teeth that need extraction                 |        |
| Total number of teeth in need of treatment |        |

***Appendix 3 Characteristics of completers versus drop-outs***

|                                               | <b>Completers</b>      | <b>Drop-outs</b>       |                   |
|-----------------------------------------------|------------------------|------------------------|-------------------|
|                                               | <b>n=88</b>            | <b>n=8</b>             | <b>Chi-square</b> |
| <b>Sex (female percentage)</b>                | 58 (65.9%)             | 5 (62.5%)              | p=0.846           |
|                                               |                        |                        | <b>T-test</b>     |
| <b>Age (SD)</b>                               | 38.9 (12.2)<br>(19-65) | 33.5 (12.4)<br>(22-57) | p=0.115           |
| <b>Years since last full dental treatment</b> | 9.9 (9.8)<br>(0-40)    | 8.7 (7.1)<br>(1-22)    | p=0.765           |
| <b>MDAS</b>                                   | 21.0 (3.0)<br>(12-25)  | 21.1 (1.5)<br>(19-23)  | p=0.908           |

*Appendix 3 shows the proportion of women compared to men that participated in the study, the mean age of participants and dental anxiety measured by both the modified dental anxiety scale (MDAS). The values are compared between completers and drop-outs by using chi-square test on binominal data and t-test on ordinal data.*

#### Appendix 4 Study-flow
