

Corrigendum

Ruuskanen M, Grenman R, Leivo I, et al. Outcome of nasopharyngeal carcinoma in Finland: A nationwide study. *Acta Oncol.* 2018;57(2):251–256.

DOI:[10.1080/0284186X.2017.1346378](https://doi.org/10.1080/0284186X.2017.1346378).

When the above article was first published online there were errors in the following sentence:

The patients treated with RT had more failures than those treated with CRT: the respective percentages for local failures were 28% and 27% ($p = .26$); nodal failure 15% and 14% ($p = .40$); distal failure 20% and 18% ($p = .26$); and overall failure 45% and 41% ($p = .049$).

This has now been corrected to read:

The patients treated with RT had more failures than those treated with CRT: the respective percentages for local failure were 33% and 25% ($p = .26$); nodal failure 18% and 13% ($p = .40$); distal failure 24% and 17% ($p = .26$); and overall failure 53% and 39% ($p = .049$).

The authors apologize for these errors.
