

Supplemental Figure 1. Age-adjusted survival curves for stomach cancer (C16) patients with and without pre-existing diabetes by data source and sex. a: Men, Latvian Registers of Cancer and Diabetes. b: Women, Latvian Registers of Cancer and Diabetes. c: Men, the National Health Service. d: Women, the National Health Service

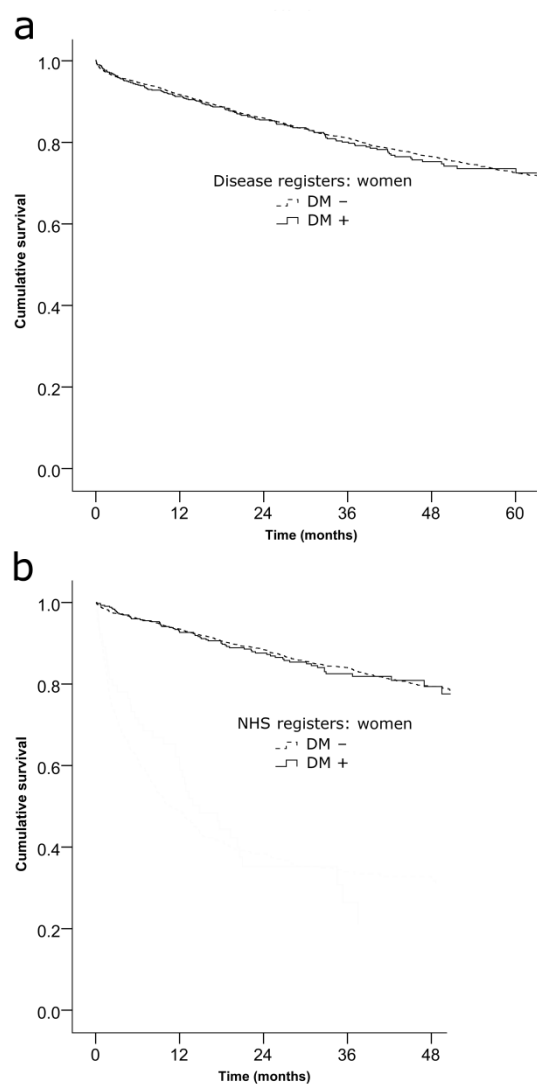

Supplemental Figure 2. Age-adjusted survival curves for colorectal cancer (C18-C20) patients with and without pre-existing diabetes by data source and sex. a: Men, Latvian Registers of Cancer and Diabetes. b: Women, Latvian Registers of Cancer and Diabetes. c: Men, the National Health Service. d: Women, the National Health Service

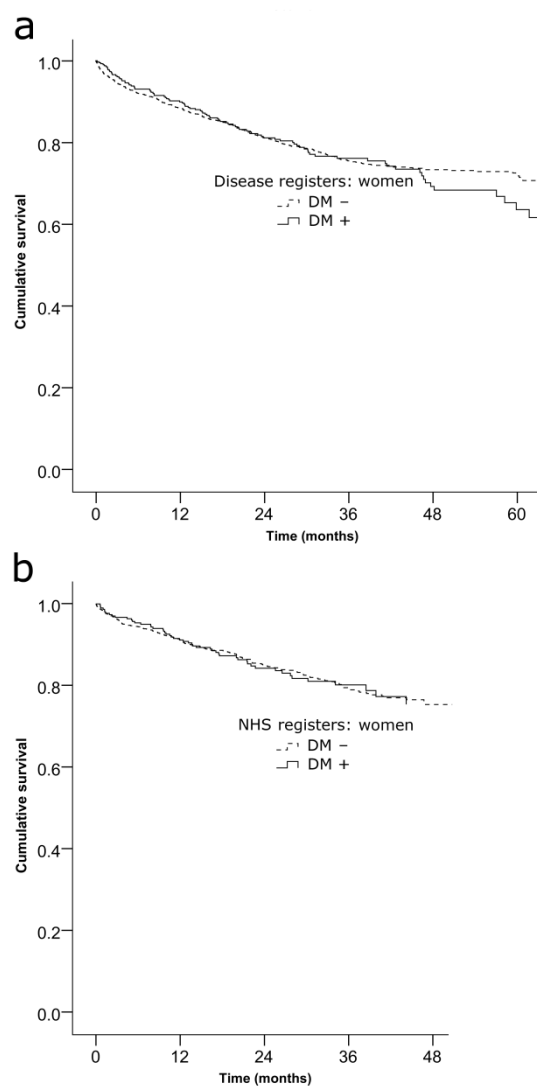

Supplemental Figure 3. Age-adjusted survival curves for pancreas cancer (C25) patients with and without pre-existing diabetes by data source and sex. a: Men, Latvian Registers of Cancer and Diabetes. b: Women, Latvian Registers of Cancer and Diabetes. c: Men, the National Health Service. d: Women, the National Health Service

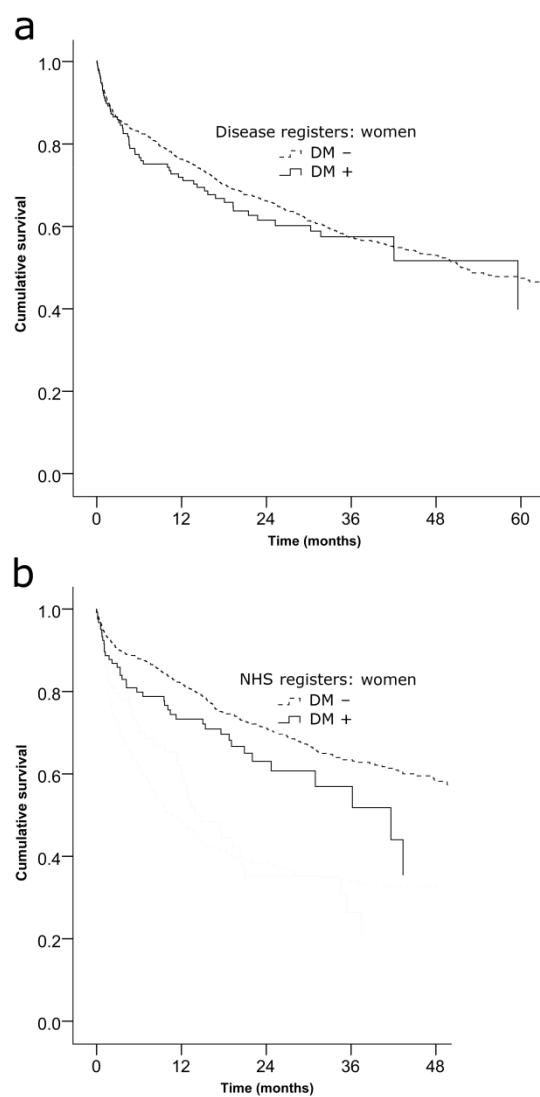

Supplemental Figure 4. Age-adjusted survival curves for lung cancer (C34) patients with and without pre-existing diabetes by data source and sex. a: Men, Latvian Registers of Cancer and Diabetes. b: Women, Latvian Registers of Cancer and Diabetes. c: Men, the National Health Service. d: Women, the National Health Service

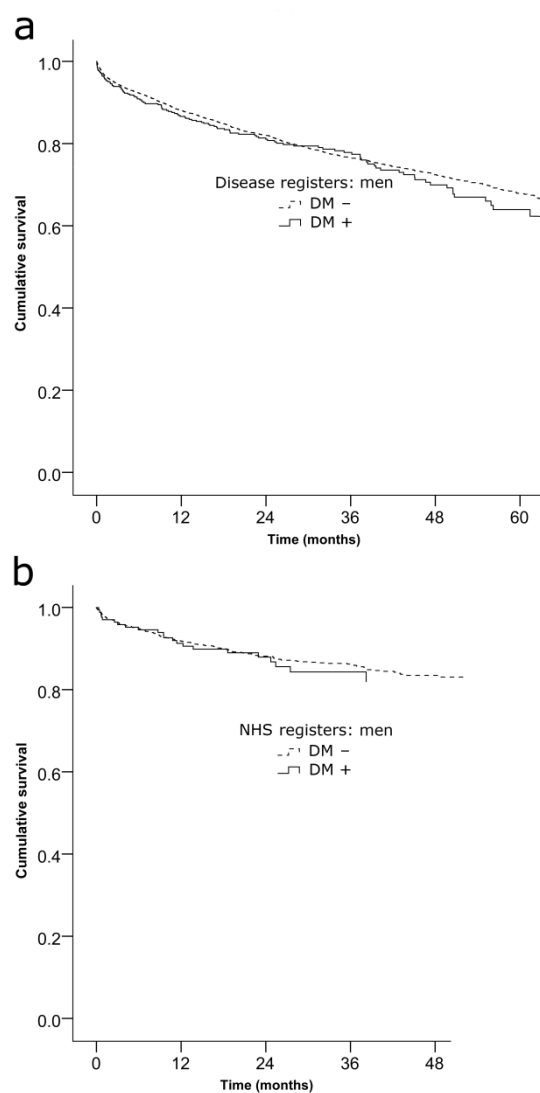

Supplemental Figure 5. Age-adjusted survival curves for breast cancer (C50) patients with and without pre-existing diabetes by data source and sex. a: Women, Latvian Registers of Cancer and Diabetes. b: Women, the National Health Service

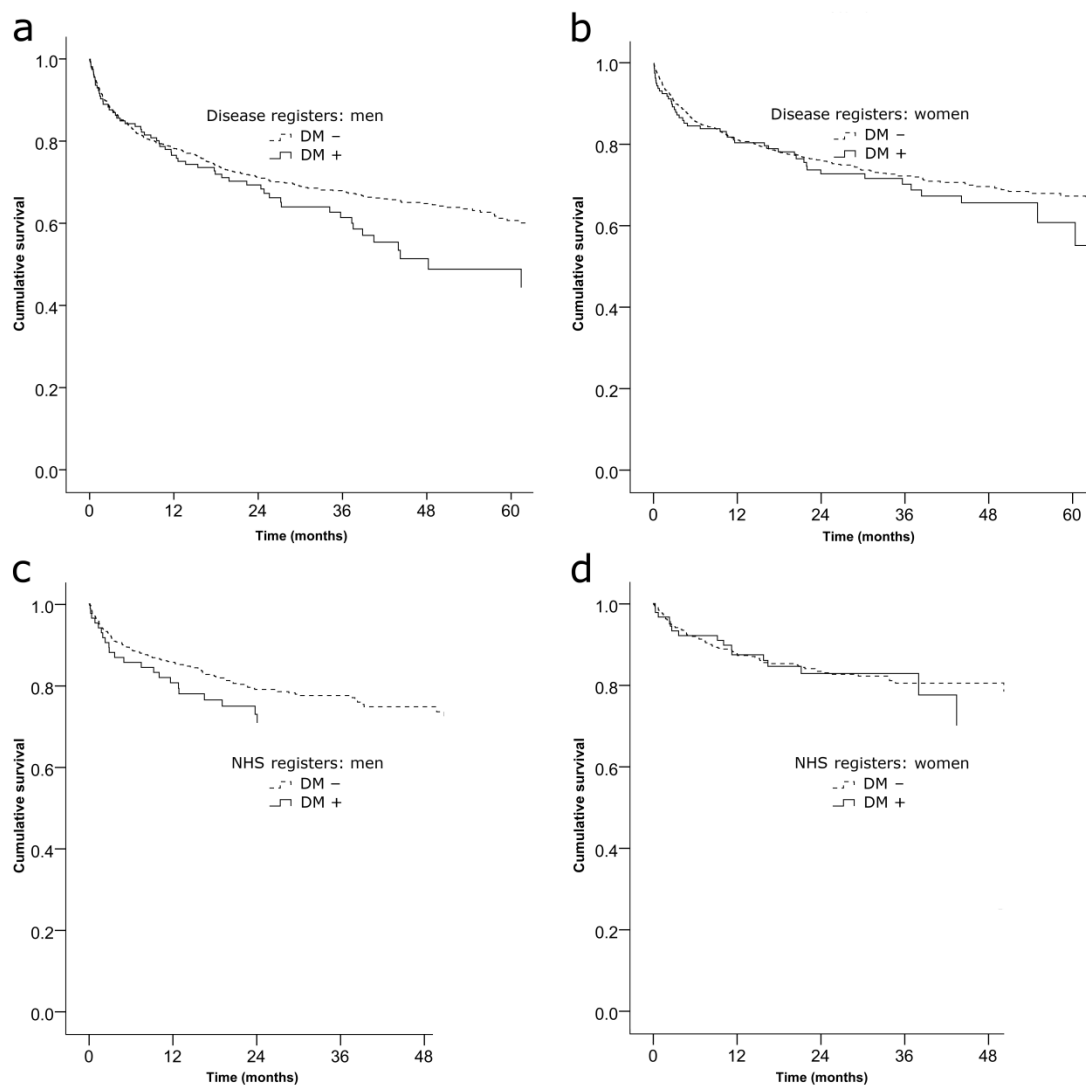

Supplemental Figure 6. Age-adjusted survival curves for corpus uteri cancer (C54) patients with and without pre-existing diabetes by data source and sex. a: Women, Latvian Registers of Cancer and Diabetes. b: Women, the National Health Service

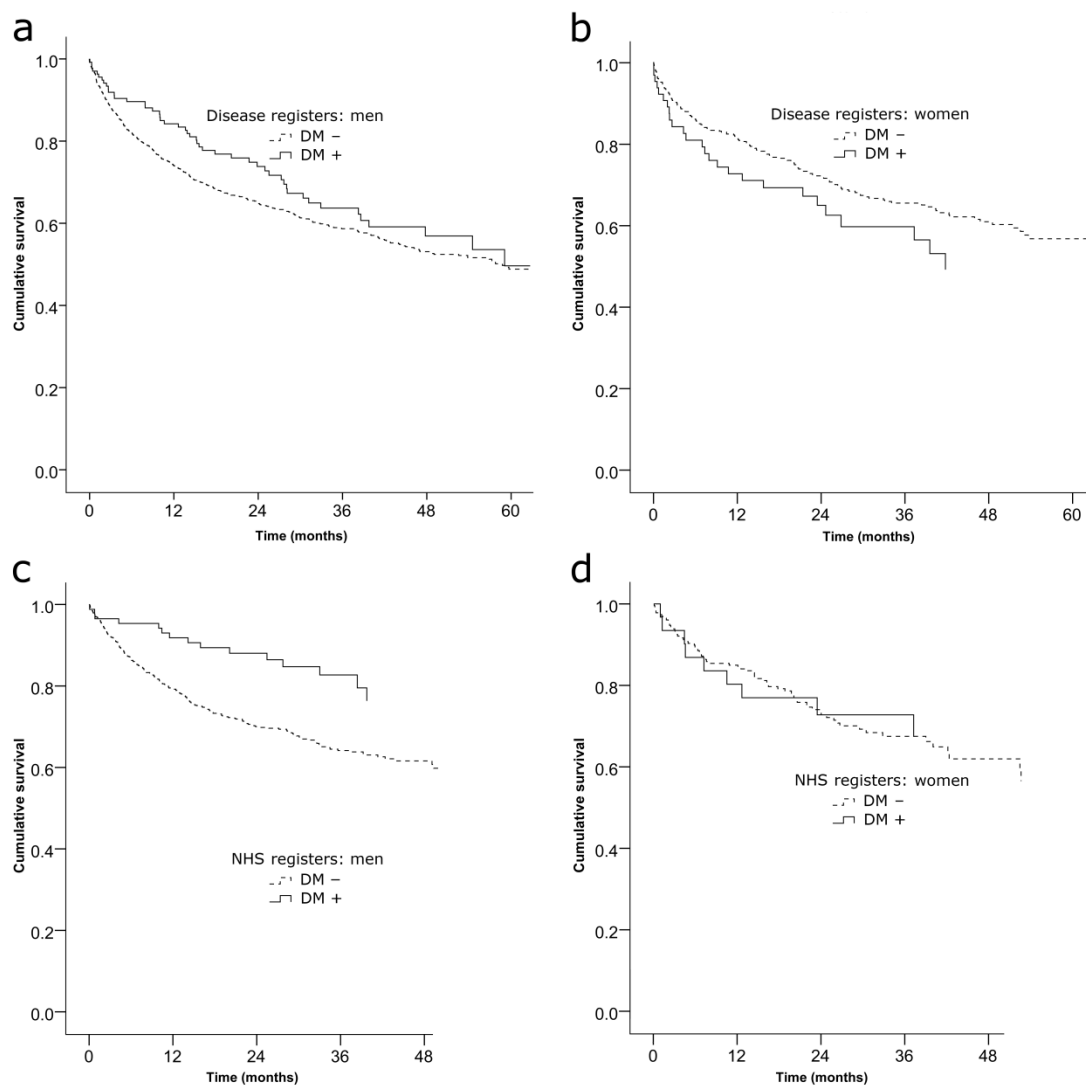

Supplemental Figure 7. Age-adjusted survival curves for ovary cancer (C56) patients with and without pre-existing diabetes by data source and sex. a: Women, Latvian Registers of Cancer and Diabetes. b: Women, the National Health Service

Supplemental Figure 8. Age-adjusted survival curves for prostate cancer (C61) patients with and without pre-existing diabetes by data source and sex. a: Men, Latvian Registers of Cancer and Diabetes. b: Men, the National Health Service

Supplemental Figure 9. Age-adjusted survival curves for kidney cancer (C64) patients with and without pre-existing diabetes by data source and sex. a: Men, Latvian Registers of Cancer and Diabetes. b: Women, Latvian Registers of Cancer and Diabetes. c: Men, the National Health Service. d: Women, the National Health Service

Supplemental Figure 10. Age-adjusted survival curves for bladder cancer (C67) patients with and without pre-existing diabetes by data source and sex. a: Men, Latvian Registers of Cancer and Diabetes. b: Women, Latvian Registers of Cancer and Diabetes. c: Men, the National Health Service. d: Women, the National Health Service
