

FULL TIME COURSES AND SEMINARS ON CLINICAL ONCOLOGY IN EUROPE

The Education Branch (EB) of the EORTC has undertaken a survey to continuously identify European full time courses in oncology. Enclosed you will find the latest listing of such courses. All courses in the presentation are suitable for international participation. The survey is based on a questionnaire that was sent to deans of medical schools in Europe and also includes the courses of the European School of Oncology (ESO) and the European Society for Therapeutic Radiology and Oncology (ESTRO).

The EB would be pleased for the submission of further courses since our updated listing of courses will be published twice annually in *Reviews in Oncology* and the *EORTC newsletter*. Please send information without delay on any full time course that is suitable for international participation. The courses must be presented according to the headlines of the present listing (Names of course, Date, Place, Organized by, Cost to attend, Chairman, Time length of course, Language of course, Themes (a few words on the contents), Secretariat with zip-code and Telephone).

The address to the EB is 'Education Branch of the EORTC, c/o Docent K.-H. Robèrt, Med. klin., Huddinge sjukhus, S-14186 Huddinge'.
