

REVIEWS IN ONCOLOGY

‘A journal within the journal’

As from this number of Acta Oncologica the Education Branch of EORTC will twice yearly—in Fasc. 1 and 4—publish REVIEWS IN ONCOLOGY. This ‘journal within the journal’ will contain pedagogical articles written by invited authors with a good outlook on different fields of oncology, including both basic and experimental subjects and clinical aspects. In REVIEWS IN ONCOLOGY the Education Branch will also announce its activities and publish lists of postgraduate courses suitable for common European participation.

The material is edited by a board, selected by the Education Branch of the EORTC, with Karl-Henrik Robèrt as chief editor and Stefan Einhorn, Ian Fentiman, Gordon McVie and Jens Overgaard as editors. In order to harmonize its content with Acta Oncologica, it is edited in intimate collaboration with the chief editor of Acta Oncologica. We hope that the publication of REVIEWS IN ONCOLOGY will promote the efforts of EORTC’s Education Branch to improve knowledge on cancer among physicians and also imply an advantage for the readers of Acta Oncologica.
