

Shaping tomorrow's oncology

Nordic signatures, global reach

Publishing cancer research since 1963, open to the advancements of the 21st century

Acta Oncologica is a foundation and the official journal of the five oncological societies in the Nordic countries and the Nordic Association for Clinical Physics.

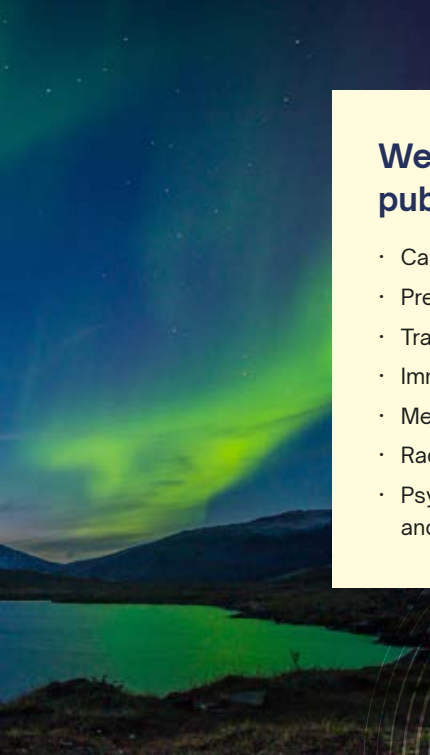

Since 1963, we are a forum for scientific communication across the broad field of oncology – from translational oncology to survivorship. Acta Oncologica is an Open Access Journal that publishes clinically relevant content and hosts cancer research symposia. We are a voice for cancer research from the Nordic region, welcome international contributions and offer global outreach with readers in more than 50 countries. The journal is published by MJS Publishing.

Welcome to join us as we continue to investigate, define, share and discuss new knowledge in oncology.

The background features a dark blue gradient with a series of concentric white circles that fade out towards the right. On the right side, there is a vertical rectangular inset showing a landscape with a body of water, mountains, and a sky with a greenish aurora or light effect.

Powered by peers in oncology

Acta Oncologica is a forum for scientific publication and communication. We are dedicated to provide the scientific community with a platform for innovative, impactful and clinically relevant cancer research across the broad oncology field. Our editorial team is committed to efficient, rigorous and constructive peer-review and fair evaluations. Acta Oncologica welcomes international contributions and offers global reach as we strive to publish research with potential to influence future clinical oncology.

A photograph of the Aurora Borealis (Northern Lights) in shades of green and yellow, illuminating a dark landscape with a lake in the foreground. The sky is dark blue with some stars visible.

We welcome and publish research in

- Cancer Epidemiology
- Prevention and Early Detection
- Translational Oncology and Cancer
- Immunology
- Medical oncology and Precision Medicine
- Radiotherapy and Radiophysics
- Psychosocial oncology, Rehabilitation and Palliative Care

A graphic consisting of many concentric circles in a dark blue color, centered on the page. The circles vary in size and are spaced evenly, creating a ripple effect.

Nordic signatures, global reach

We come from a region with a strong reputation for population-based data, multidisciplinary research efforts and cross-border collaborations.

The Nordic countries offer exceptional conditions for insights that can be translated into better care. Infrastructure and know-how provide new options. To us this is home and the base from which we welcome international contributions and aim for global outreach.

Clinical oncology cures cancer at a high rate. We strive for more. Join us in sharing, communicating and translating new discoveries into even better treatments and outcomes for patients affected by cancer.

Nordic signatures

- Population basis
- Multidisciplinarity
- Cross-border collaboration
- Treatments and outcome in the forefront
- Translating discoveries for better care
