## Supplementary material has been published as submitted. It has not been copyedited, or typeset by Journal of Rehabilitation Medicine

**Fig. S1.** Patient level collection of reported data in the control and intervention arms. The flow chart shows the time point of the first low back pain-related visit to healthcare professional in the study and the time of signed consent. There was a delay of 1 to 3 weeks from the first contact with a healthcare professional in the patient's own primary care center and collection of baseline questionnaire data requested by the research nurse.

Control	Usual care  and signed consent  Baseli after 1: week	to 3 3 months 12 month	s
Intervention	Classification- based care and signed consent  Baseli after 1	to 3 3 months 12 month.	s
