

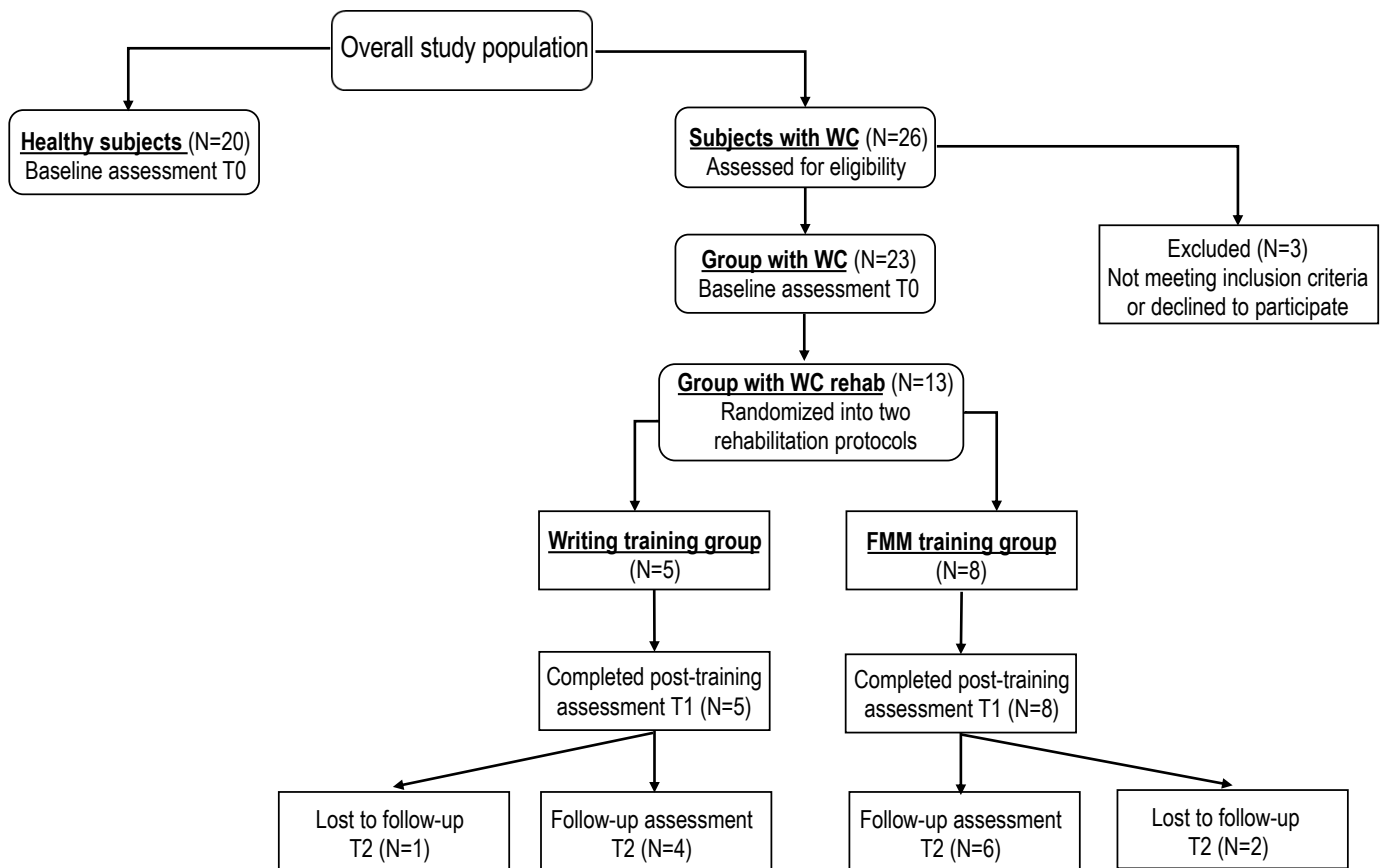

Fig. S1. Recruitment flow-chart.

The cross-sectional study was based on N=20 healthy subjects and N=23 patients with writer's cramp, all assessed at T0. The secondary rehabilitation study concerned N=13 patients, with N=5 in the writing group, and N=8 in the FFM group. Abbreviations. WC: writer's cramp; T0: initial assessment (pre-rehabilitation); T1: assessment post-rehabilitation; T2: follow-up assessment (4±1 weeks after T1).
